SUMMARY

Motivated entry-level software engineer with a strong foundation in computer science, eager to contribute to cloud and backend

SKILLS

Python, SQL, Docker, Kubernetes, AWS, PostgreSQL, React, Java, Git

EXPERIENCE

Software Engineering Intern - Apex Innovations (2023 - 2024)

- Wrote Python automation scripts for scheduled data extraction and log parsing.
- Formulated basic SQL queries to assist senior engineers with performance reporting.
- Participated in weekly agile standups and maintained code documentation.

EDUCATION

B.S. in Software Engineering - Boston University (2020 - 2024)

PROJECTS

Student Grade Tracker

- Built a command-line student records management utility in Python using standard libraries.
- Implemented file storage and simple calculation algorithms.

CERTIFICATIONS

CompTIA Security+
